

The Convergence of Reason and Wonder

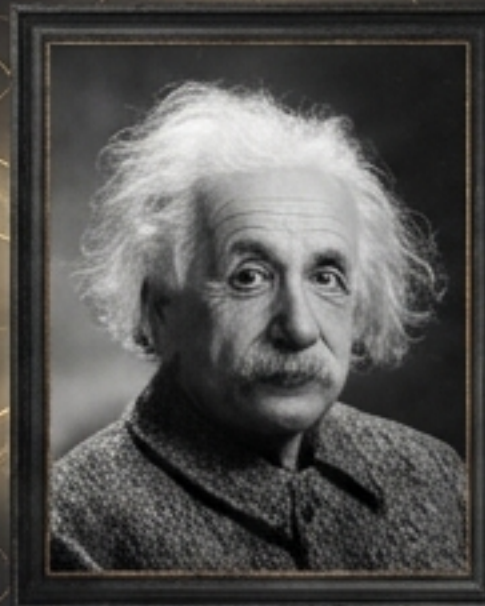

Belief in a Creator is not contradictory to scientific inquiry; it is often the engine of discovery.

Isaac Newton:
Saw prophecy in physics.

Max Planck:
Science and faith are not incompatible.

Albert Einstein:
A cosmic religious feeling.

Francis Collins:
The Language of God.

The lineage of scientific inquiry and spiritual awe.

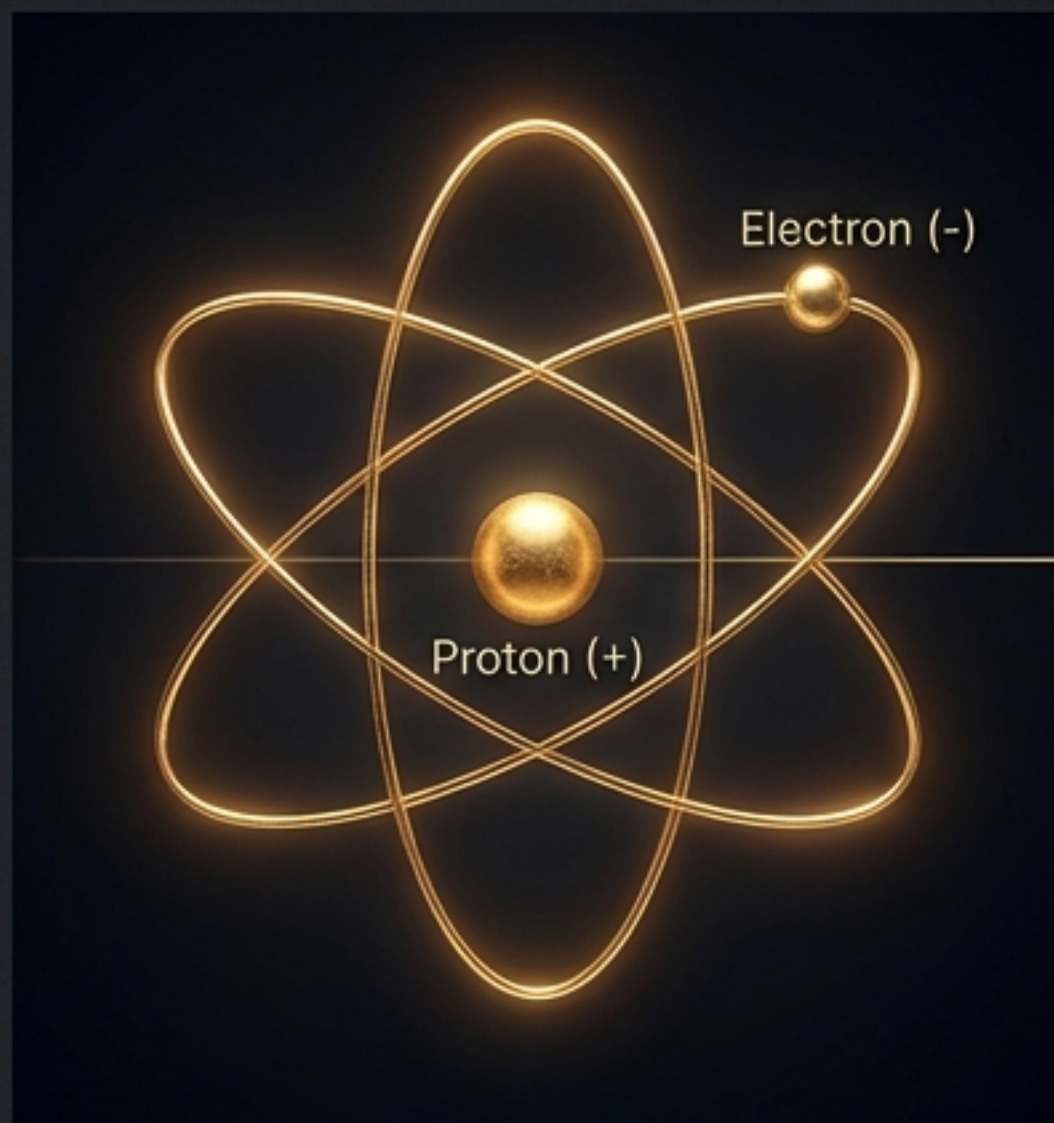

To Know the Artist, Examine the Art

The Principle: “Ever since the creation of the world his invisible nature... has been clearly perceived in the things that have been made.” (Romans 1:20)

The Thesis: If the universe displays a consistent pattern, the Source of the universe must embody that pattern perfectly.

The Universal Code of Polarity

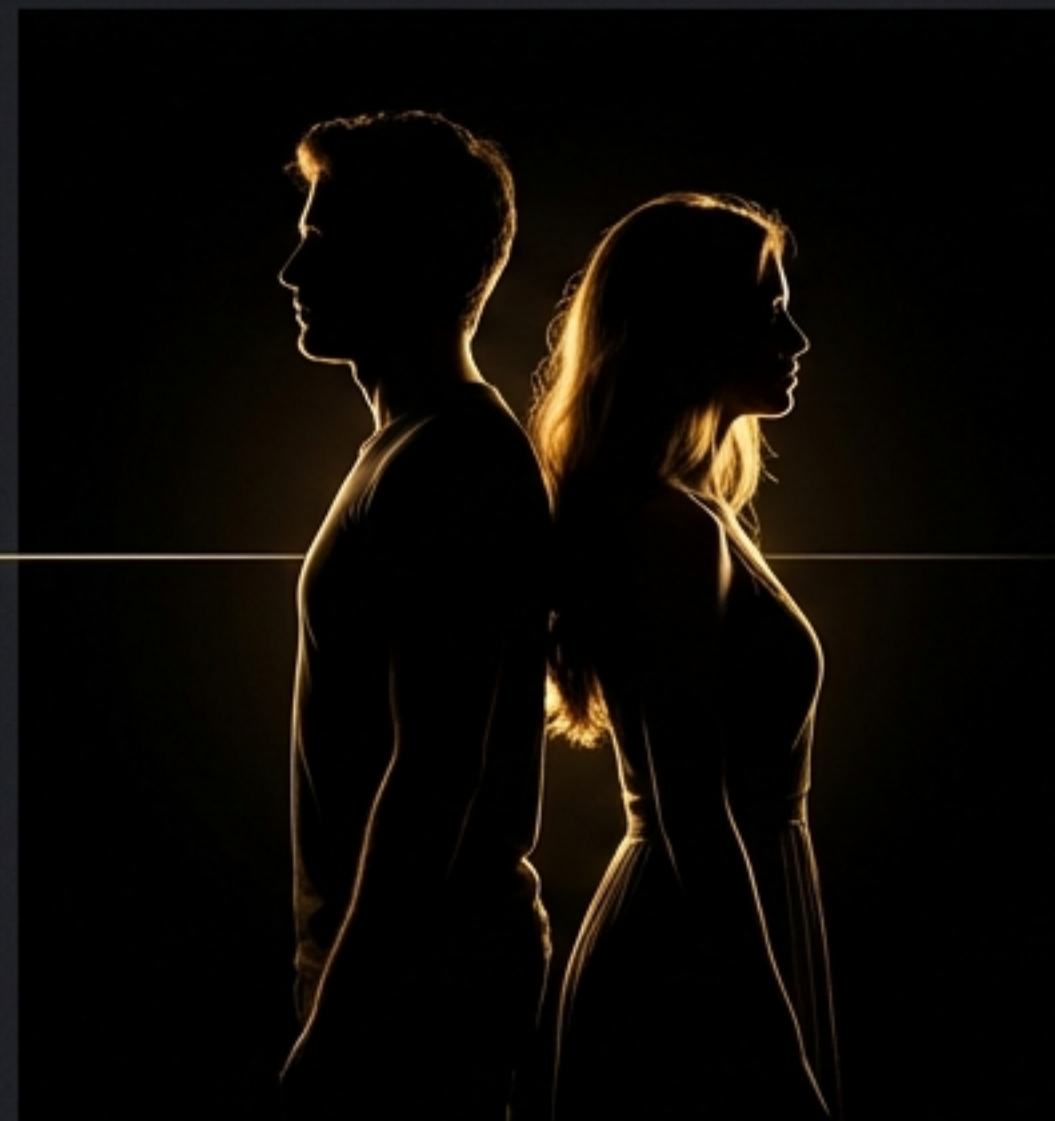

Physics: Positive & Negative

Biology: Stamen & Pistil

Humanity: Male & Female

Insight: Nothing exists in isolation. Existence requires a reciprocal relationship between Yang and Yin.

The Architecture of the Seen and Unseen

Internal Nature (Sungsang):
The intangible, causal, subject partner (e.g., Mind, Directive Energy).

External Form (Hyungsang):
The tangible, resultant, object partner (e.g., Body, Matter).

The body resembles the mind and moves according to its purpose.

Deducing the First Cause

God / The Great Ultimate

Original Internal Nature

Original External Form

Logic: The First Cause must possess the harmonious dual characteristics of the resultant creation.

Definition: God is the Subject in whom Original Internal Nature and Original External Form are in harmony.

The Pulse of Existence

Universal Prime Energy

Universal Prime Energy:

The fundamental, absolute energy of God. The origin of all forces.

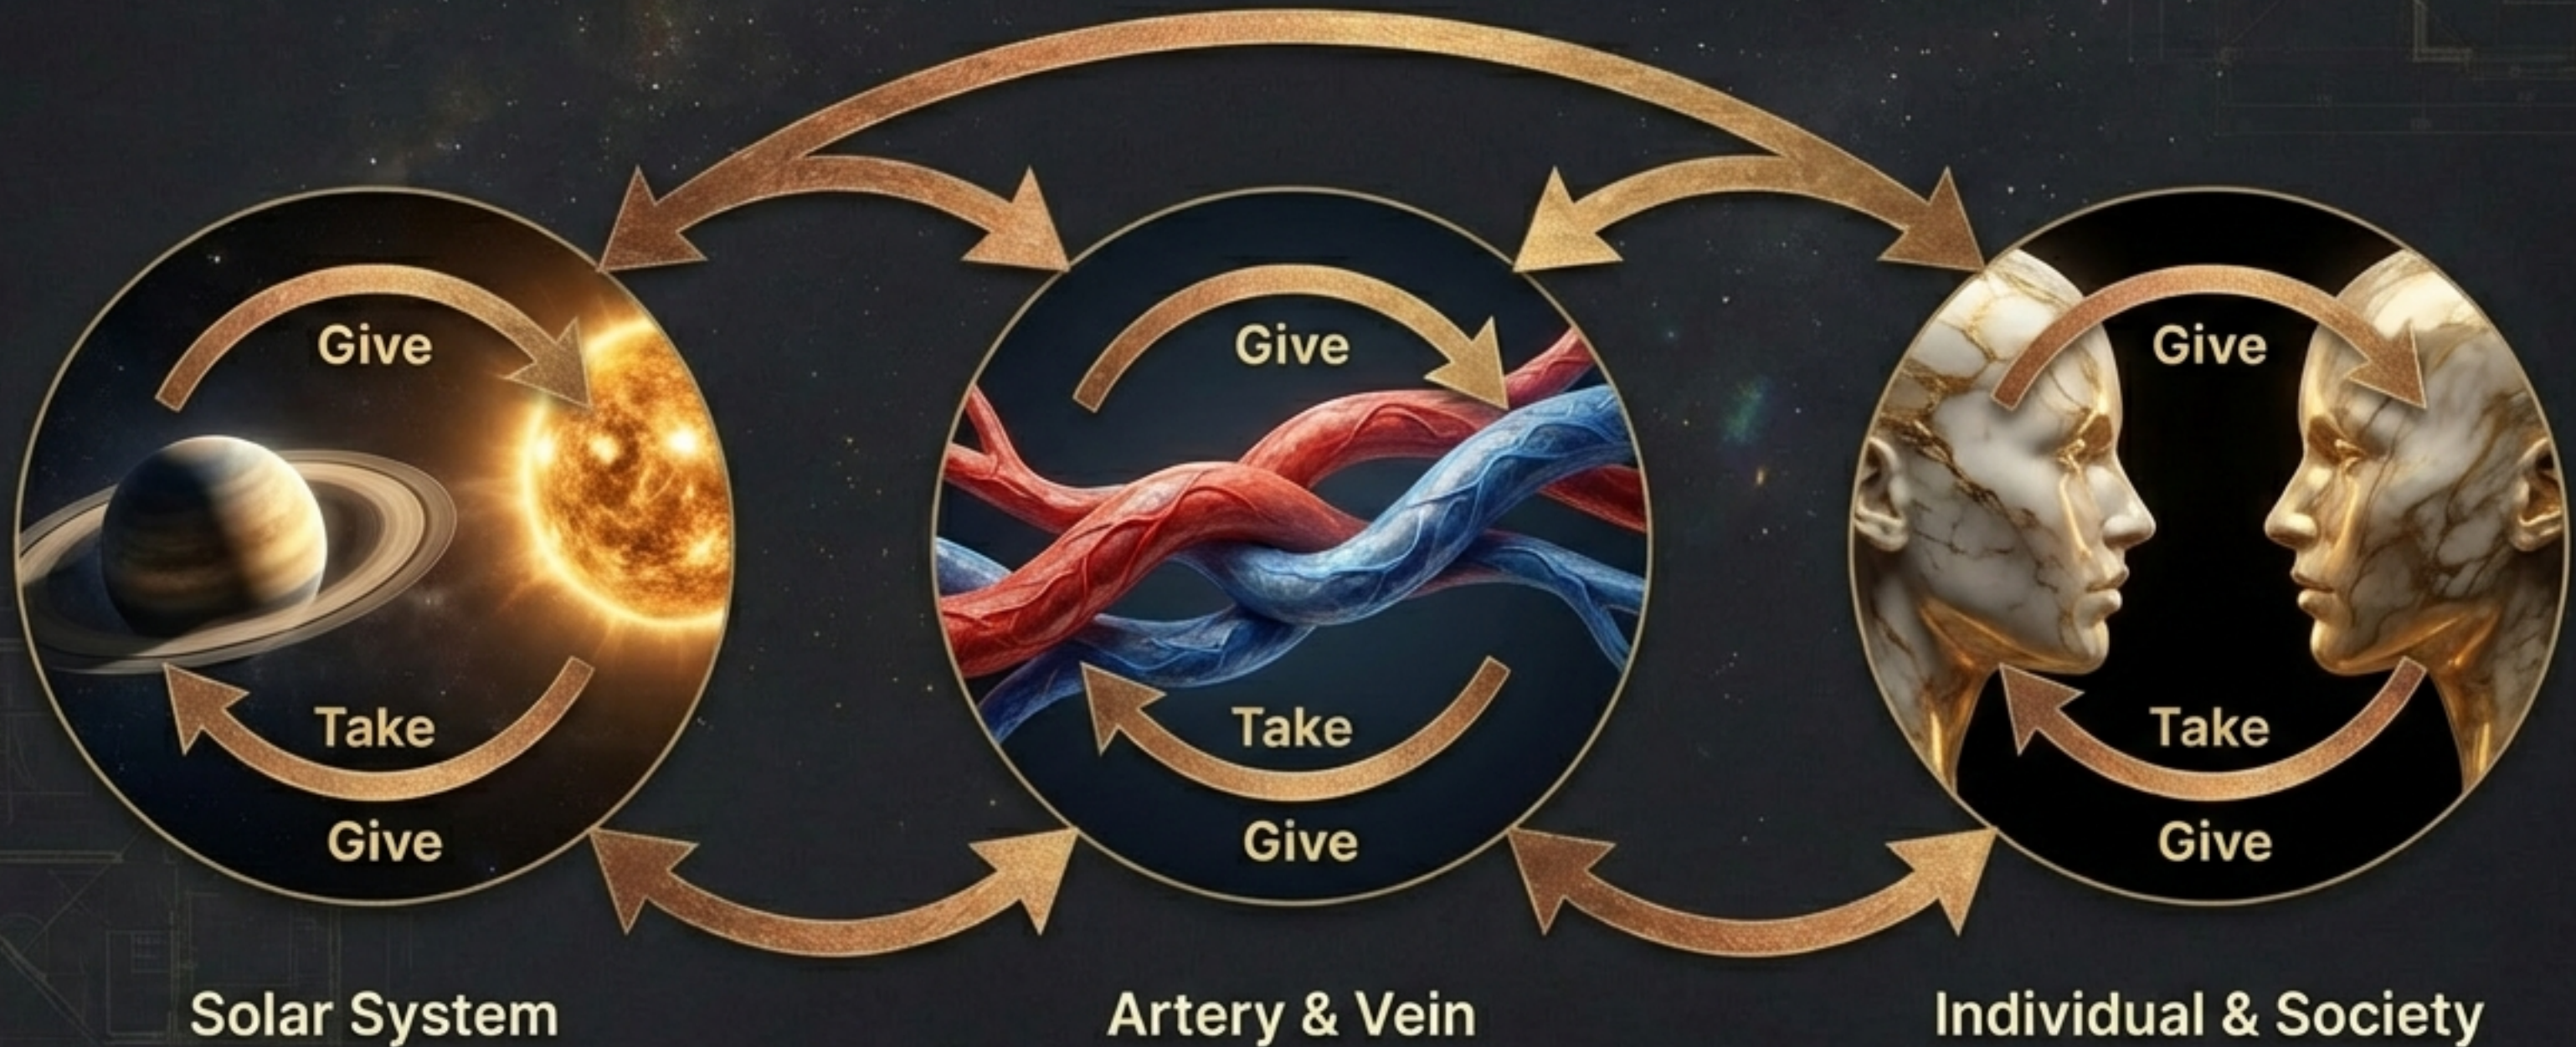

The Flow: Vertical (Cause) generates Horizontal (Result).

Forces of Existence

The Law of Interaction

Give and Take Action: The interaction that generates forces for existence, multiplication, and action.

Requirement: Subject and Object must form a "Common Base" centered on a shared purpose.

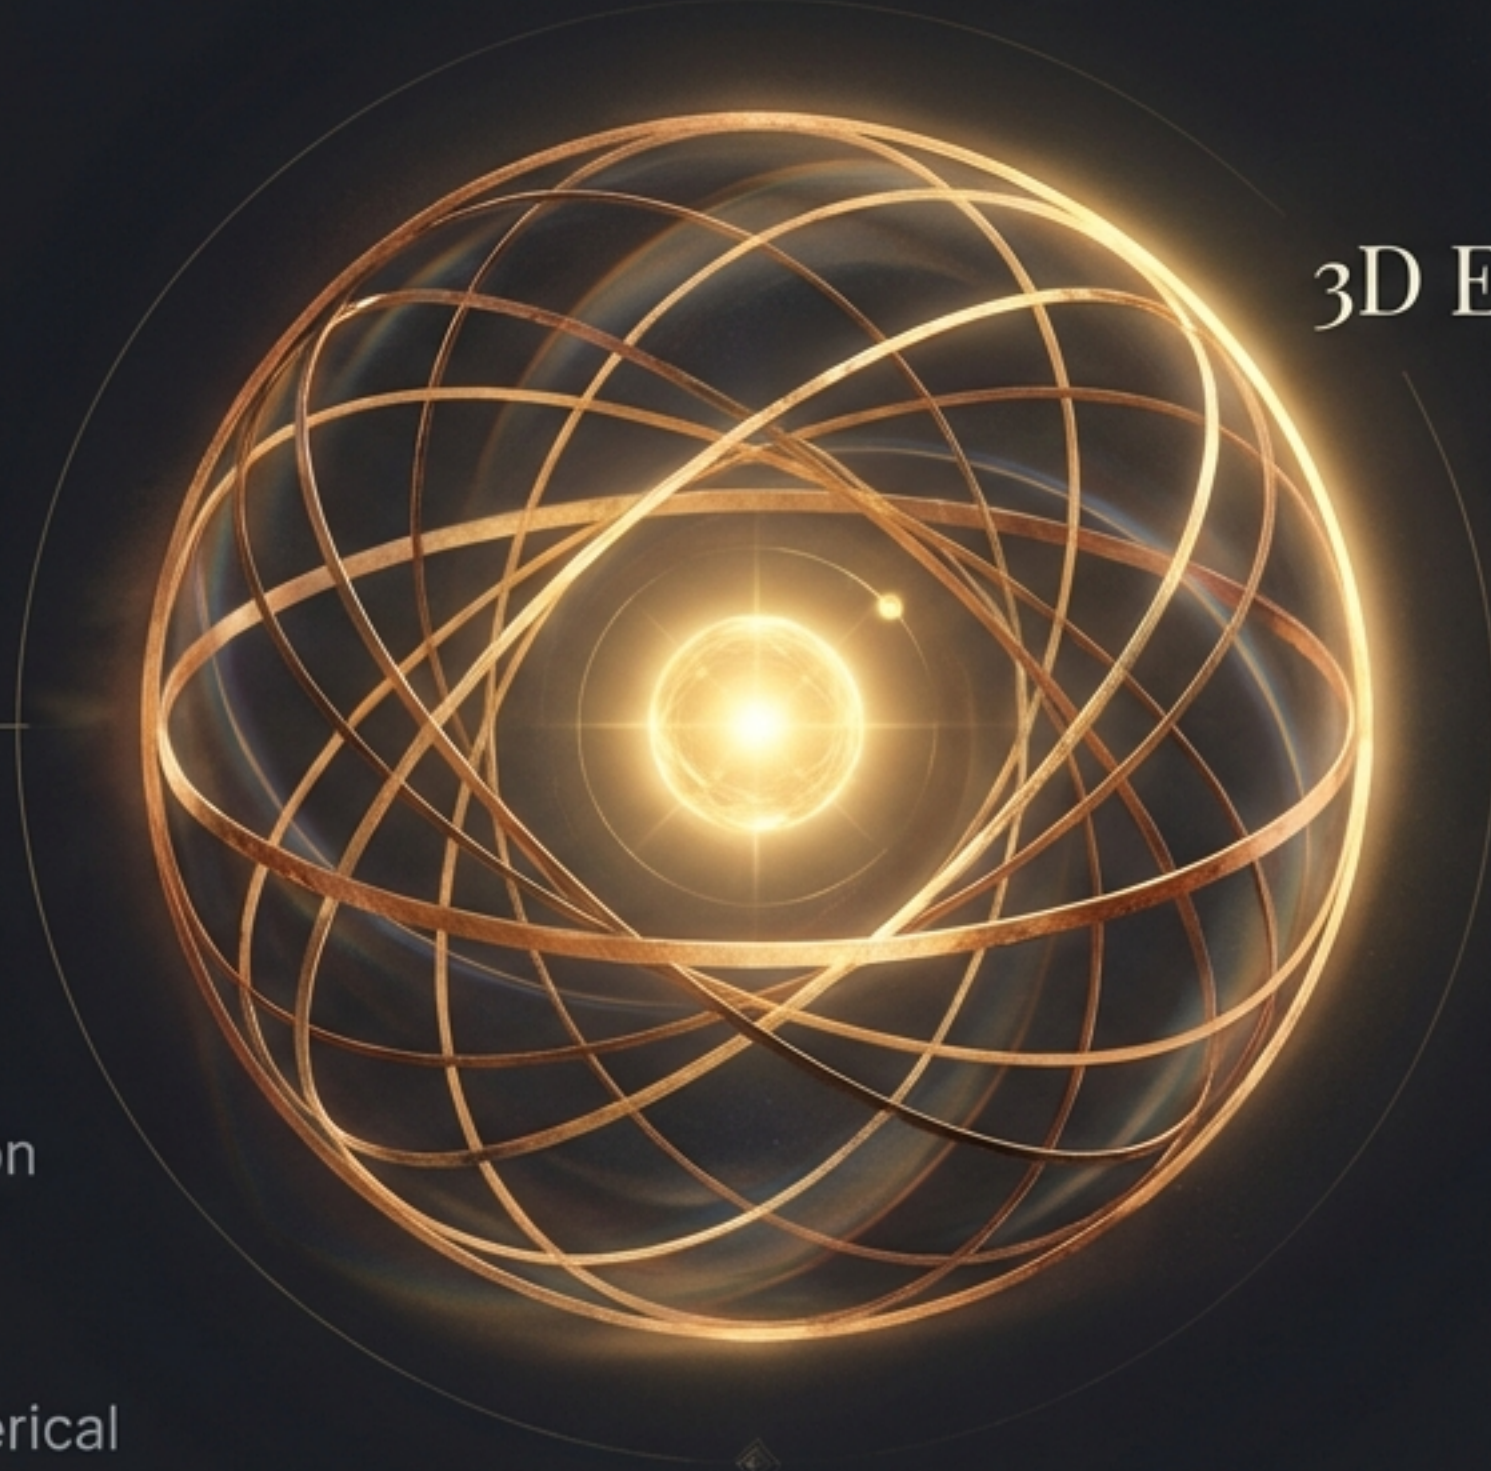

The Blueprint of Stability

- Origin-Division-Union Action
- The root of numbers 3, 4, and 12.
- The eternal foundation for God to abide in creation.

From Linear to Spherical

3D Existence

Give and Take Action creates circular motion.

Because the angle of revolution constantly changes, the orbit becomes spherical.

The ultimate center of all spherical movements is God.

The Reason for Creation

- Why did God create? To feel Joy.
- Mechanism: Joy arises only when an object partner reflects our internal nature.
- Genesis: "God saw that it was good."

The Three Great Blessings

1. Individual Perfection

2. Family Multiplication

3. Dominion over Creation

Be Fruitful. Multiply. Have Dominion.

The Law of Growth

The Process: "One day" = Evening + Morning.
Everything reaches perfection through three ordered stages.
The Fall occurred during the Growth Stage (Immaturity).
