

The Root of Human History

Unlocking the Mystery of Lineage, Trauma, and Restoration

The Paradox of Omnipotence

If God is benevolent and omnipotent, why has restoration taken 6,000 years?

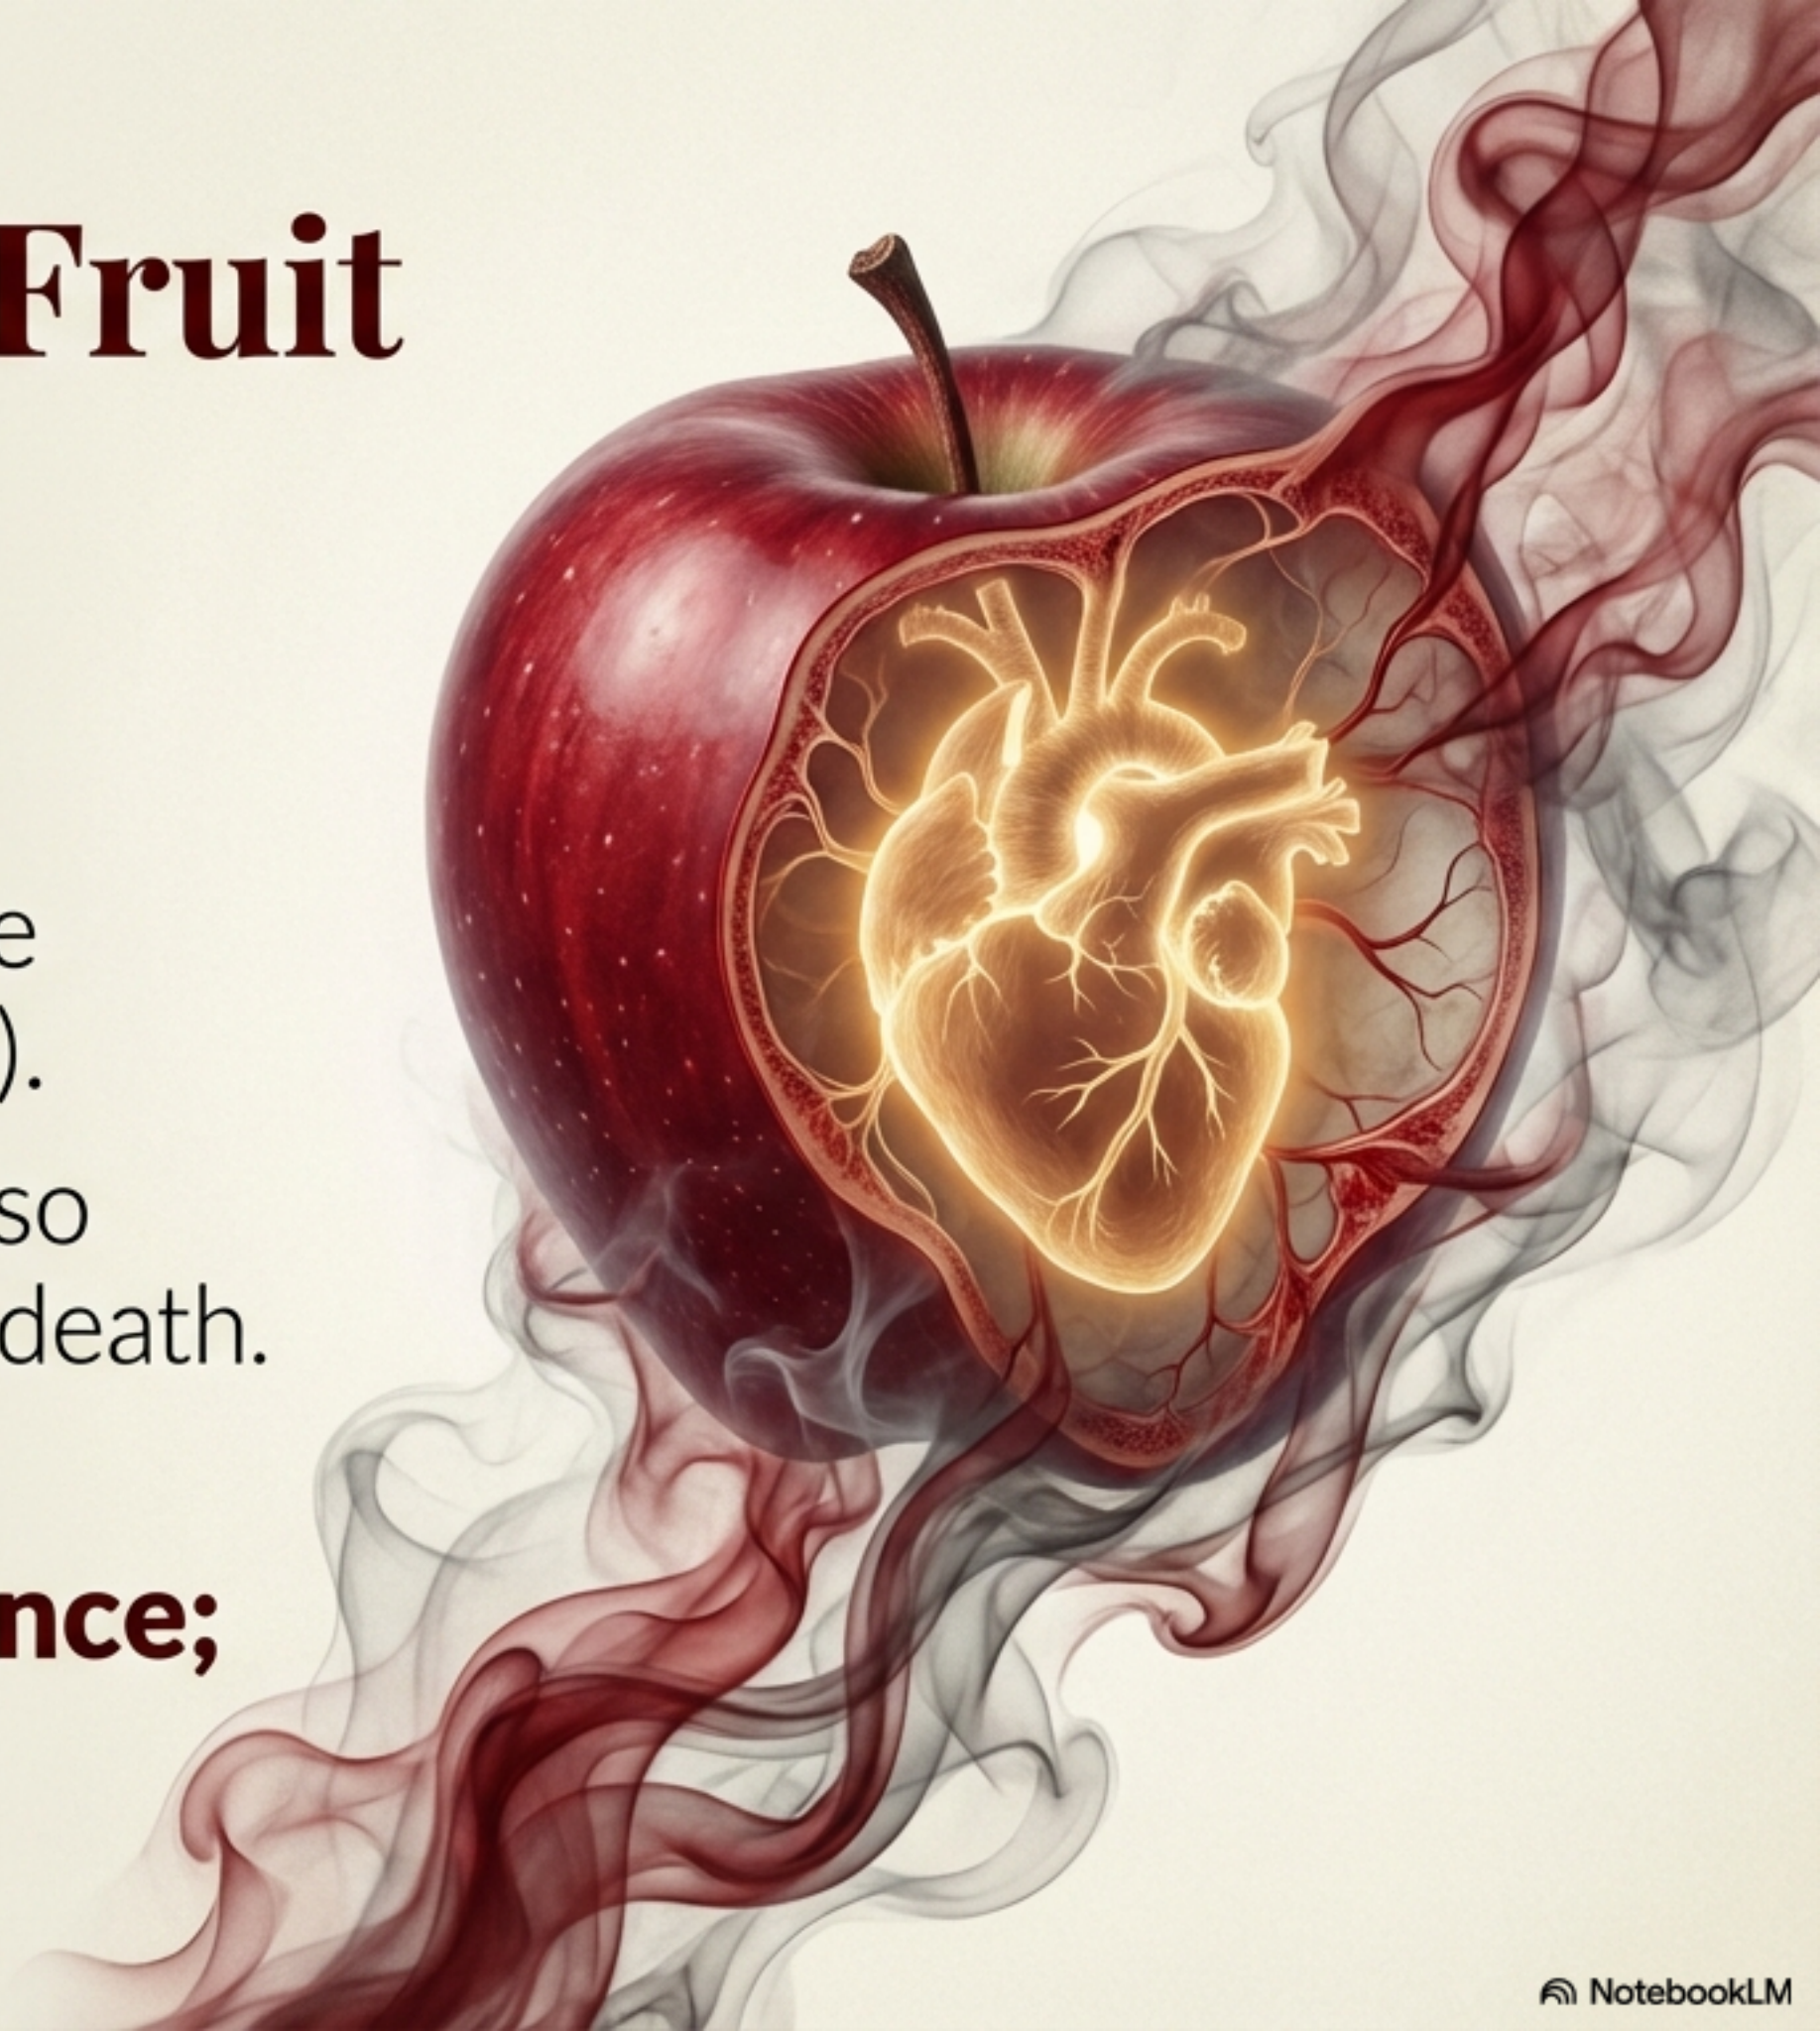

The blockage is not a lack of power, but a specific legal constraint.

“If God is going to restore us all, He must be anxious to restore us as soon as possible.” — Sun Myung Moon

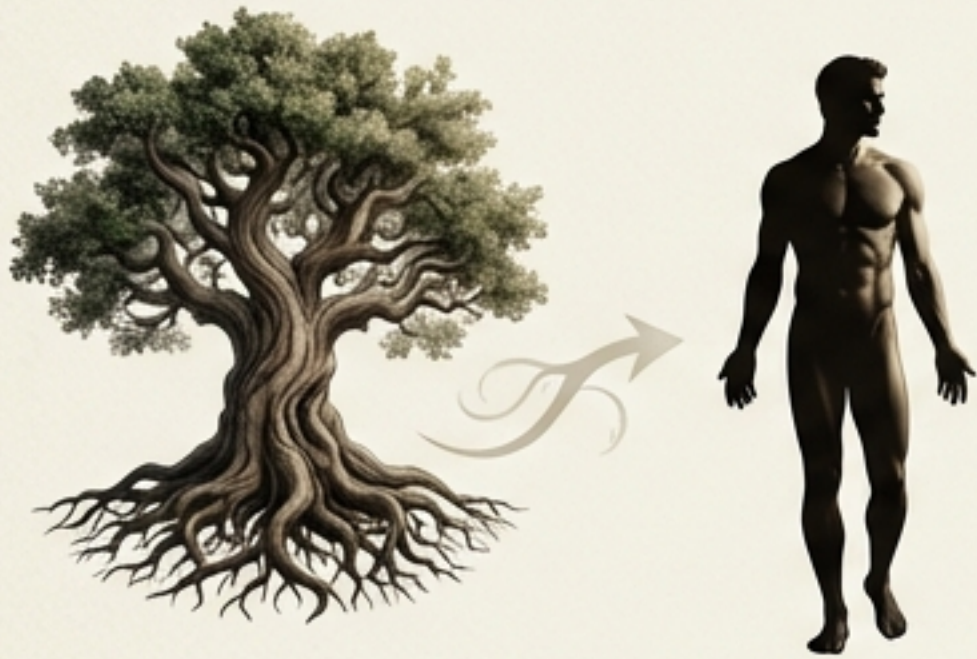

Beyond the Literal Fruit

- Would a loving Parent condemn humanity to death over a dietary mistake?
- Jesus said: “Not what goes into the mouth defiles a man.” (Matt 15:11).
- The “Fruit” represents something so stimulating it overrode the fear of death.

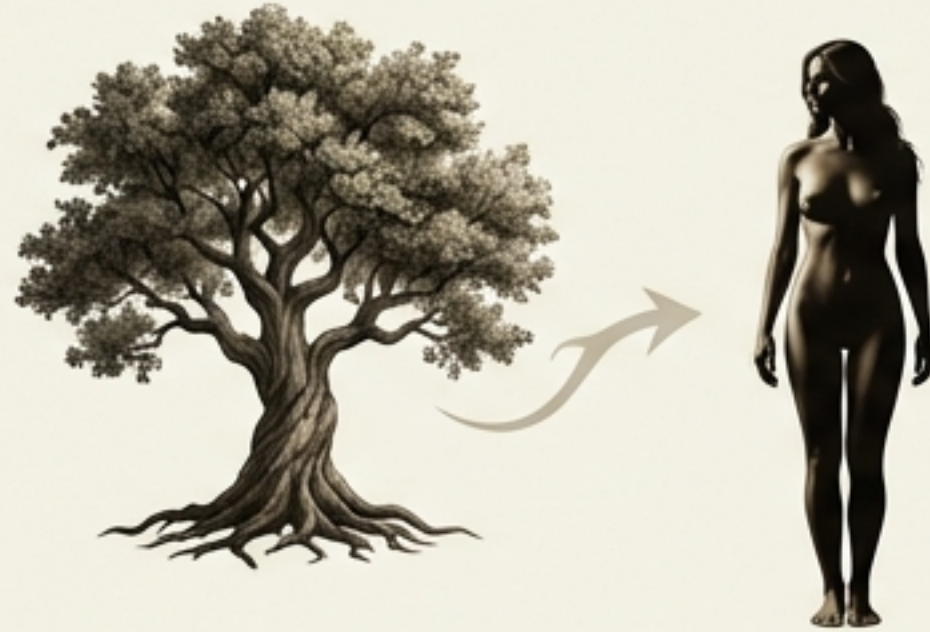

**The test wasn't about obedience;
it was about Love.**

The Players in the Garden

Tree of Life =
Perfected Adam (Jesus)

Tree of Knowledge =
Perfected Eve

The Serpent =
The Archangel (Lucifer)

Symbols concealing entities who could converse, understand God's Will, and commit sin.

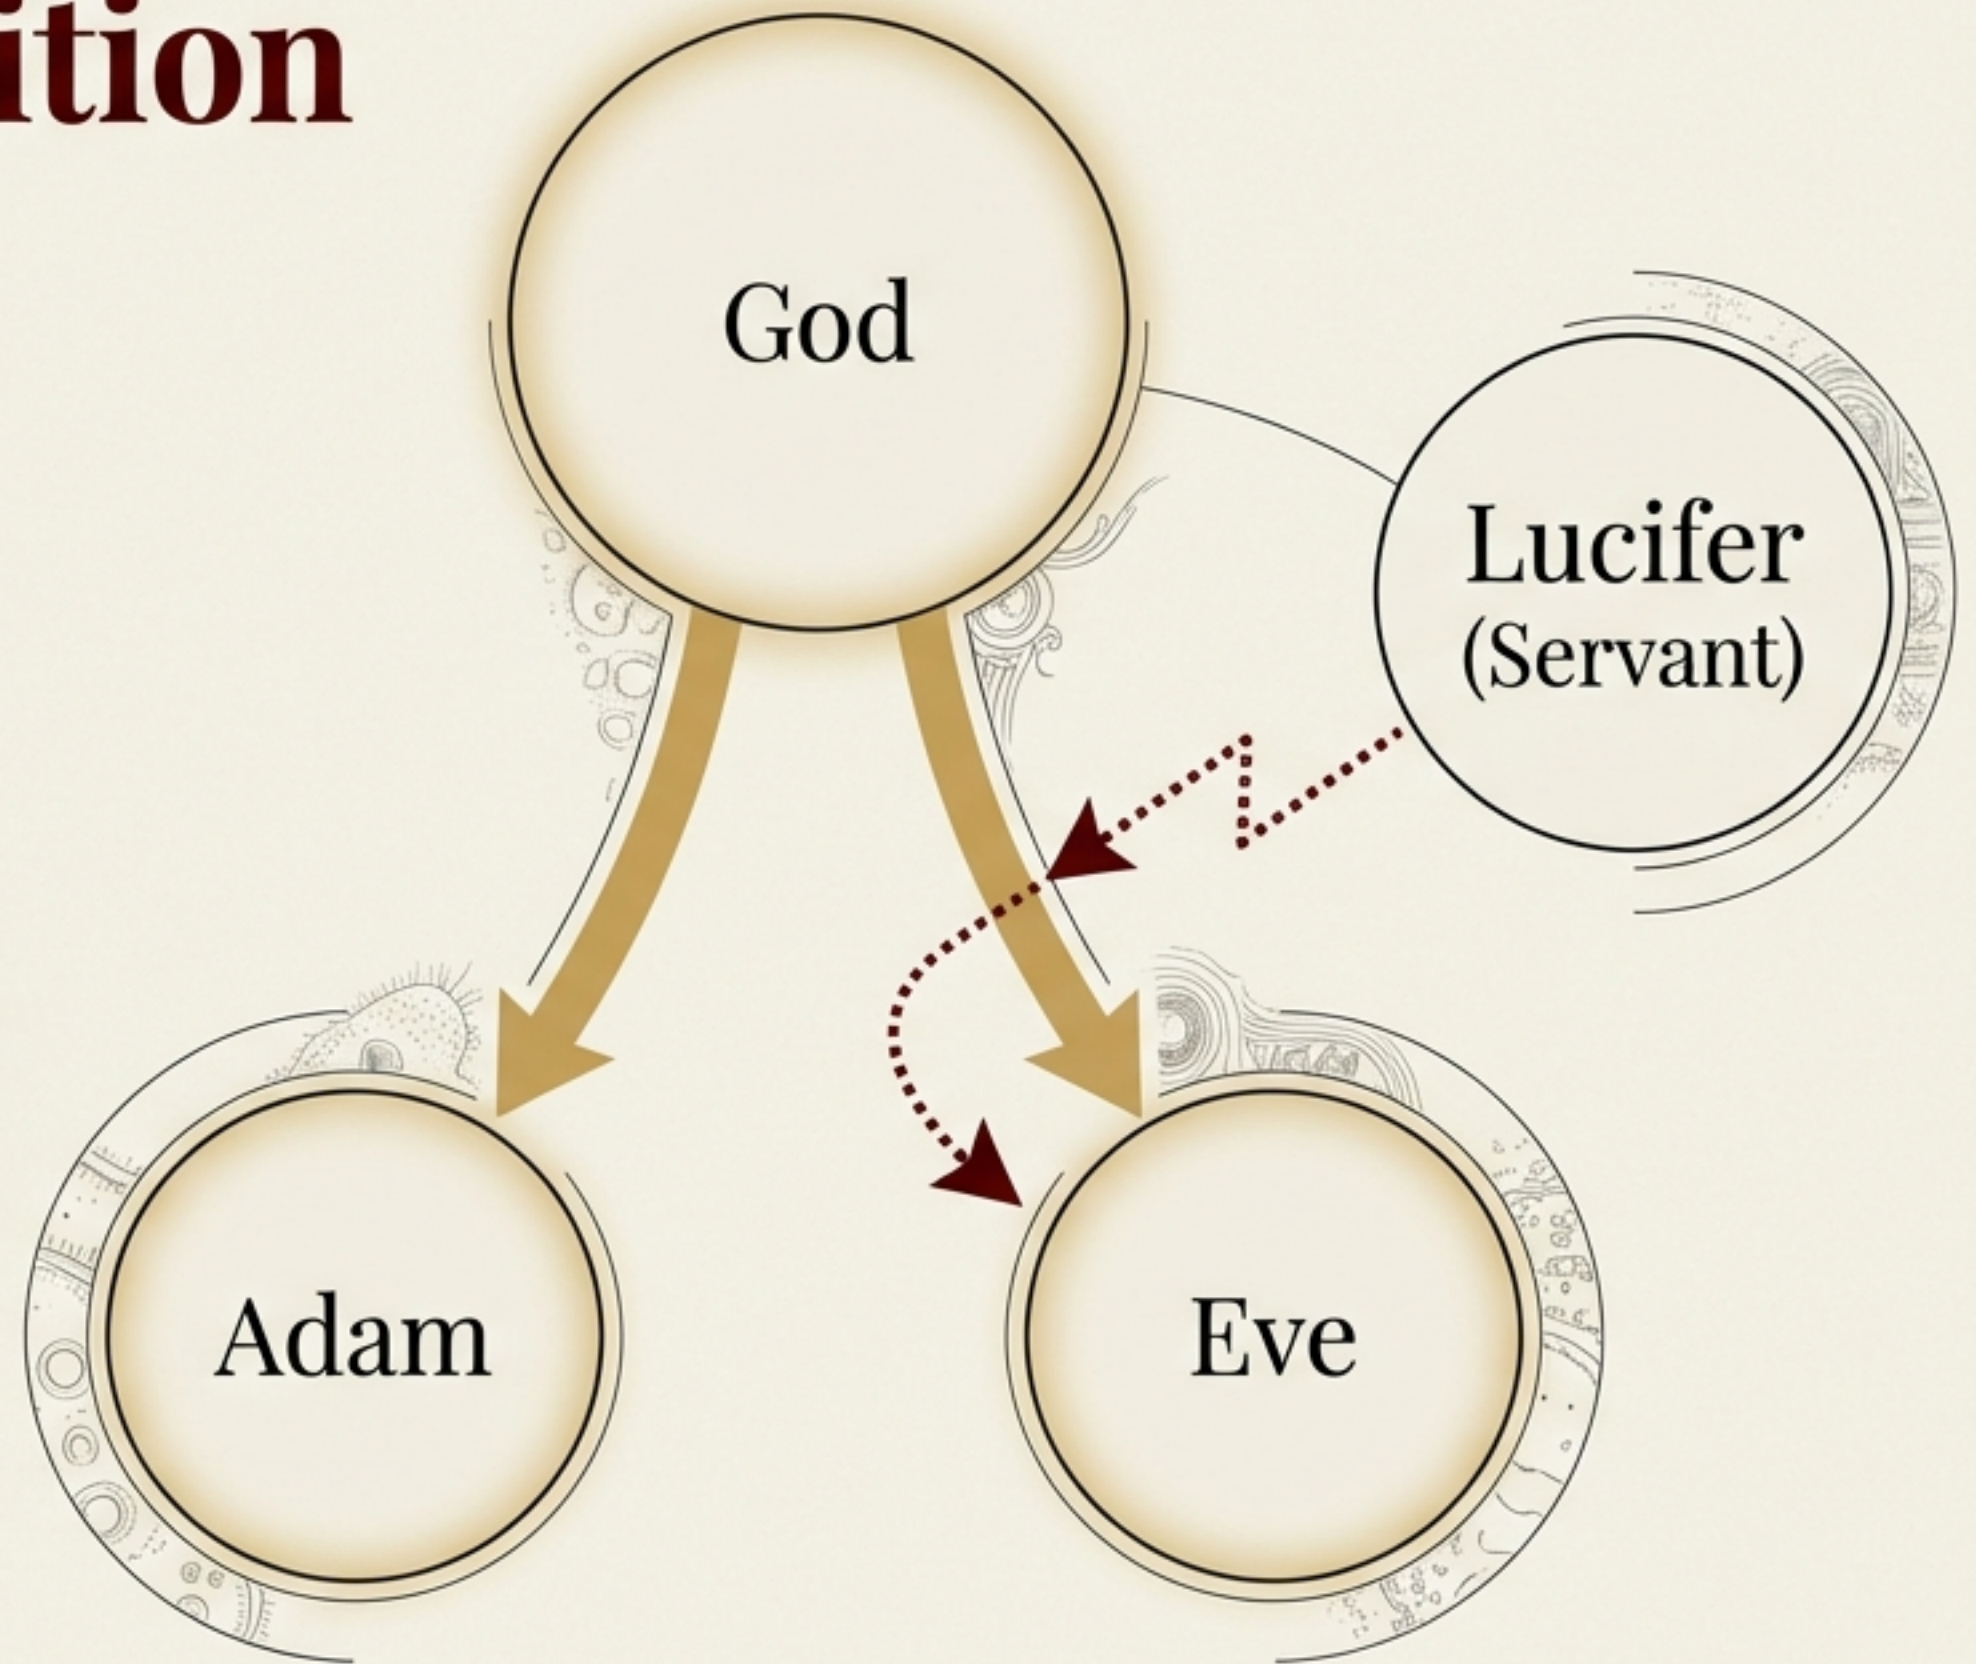

The Crisis of Position

The Motive: Envy

The servant coveted the love God gave to His children.

The Method: Misplaced Love

Satan sought to take the object of God's love (Eve) to be his own.

The Illicit Union

The Spiritual Fall: Eve & The Archangel.
A union of **unprincipled love** planting the seed of **fear**.

The Physical Fall: Eve & Adam.
Premature union based on **trauma**,
not God's blessing.

The Result: Humanity inherited a lineage
disconnected from the Source.

**The root of sin is not disobedience,
but the misuse of blood lineage.**

A Change of Ownership

Divine Lineage

“You are of your father the devil.” (John 8:44)

We were created to be God’s children but were born into a false lineage.

The Conflict: Our body and mind are at war because of this conflicting inheritance.

Fallen Lineage

Written in the Blood

Methylation

FKBP5 Gene

Epigenetics: **Trauma** is not just psychological; it alters **gene expression**.

Evidence: Stress-response genes are passed to offspring (e.g., **Holocaust survivors**).

The Parallel: Science confirms that the “**sins of the fathers**” are encoded in our biology.

The Cellular Legacy

Microchimerism: Maternal and fetal cells cross the barrier and persist for decades.

Mitochondrial Inheritance: Energy and resilience are passed exclusively through the maternal line.

The Reality: We physically carry the history—and trauma—of our ancestors in our very cells.

The Limits of Individual Effort

“You cannot **drain out stained blood.**”

Moral codes improve behavior, but they do **not change** the **root lineage.**

The **Requirement:** We need a **donor** from **outside the infected system.**

The Necessity of the Messiah

- The Messiah comes as the "Second Adam"—the unfallen root.
- Mission: To restore the original lineage and establish a new starting point.
- Jesus came to graft humanity back to God, but the path was blocked.

Grafting into the True Lineage

“Whoever wants to save their life will **lose** it.” (Luke 9:24).

The Process: We must **deny** the “**false self**” (**Satanic lineage**) to be grafted into the True Lineage.

This is the fundamental **Change of Blood Lineage**.

Restoring the Feminine

- The Fall destroyed the perfection of Adam and Eve; Restoration requires both.
- The Goal: The “Marriage of the Lamb”—The Messiah and his Bride restore the position of True Parents.
- The Result: God can finally dwell within a perfected family unit.

One Family Under God

True Parentism: Replacing all political ideologies.

The **End of Barriers:** Language and borders are scars of the Fall; they dissolve in the **restored lineage.**

The Ideal: **True Brotherism**—a world where humanity shares a common root.

The Final Mobilization

- We are in a battle for the **bloodline**.
- The Mandate: **Mobilize** beyond race, nation, and gender.
- Action: Deny the old self. Inherit the new **lineage**. Build the **Kingdom**.

“Are you ready to fight for the sake of the world?”
